CAREER SUMMARY

I've completed a Flutter development course where I learned to build apps using GetX for state management, focusing on clean and organized code. I am now eager to expand my skills further by working on real-world projects within a collaborative team environment. My goal is to continue growing as a developer by taking on more responsibilities and solving practical challenges.

WORK EXPERIENCE

Flutter Intern

VirtueNetz, Rahim Yar Khan

April 2025 – July 2025

- Contributed to the development of a task management system used internally by the company.
 - Implemented role-based user authentication and real-time Firebase integrations.
 - Integrated Cloudinary for image/file storage and Syncfusion charts for user and project tracking.
 - Built notification features using Firebase Cloud Functions for project/task changes and status updates.
-

RELEVANT PROJECTS

To-Do App (*Flutter, GetX, Local Storage*)

- Created a minimal and responsive to-do list app.
- Used local storage for persistent offline access.
- Applied GetX for smooth and reactive state management.

Task Management System (for VirtueNetz) (*Flutter, Firebase, Syncfusion, Cloudinary*)

- Designed for both Admin and User roles using Firebase Authentication.
- **Admin Panel:** Create, update, delete projects and tasks, assign users, track progress using Syncfusion charts.

- **User Panel:** View assigned projects and tasks, update task status, and track due dates.
- Cloud Functions power real-time notifications (assignments, removals, status updates).
- Cloudinary used for storing project images and files securely.

Donation App (In Progress)

- Building a multi-role donation system with three apps: **Admin**, **Donor**, and **Aid Worker**.
- Admins manage campaigns, aid workers handle logistics, and donors can view real-time impact.
- Focused on secure role-based access, scalable structure, and clean UI/UX.

Stylish – eCommerce App (*Flutter + Firebase*)

- A modern and responsive shopping app with a clean interface.
 - Firebase Authentication with Email and Google Sign-In.
 - Integrated GetX for routing and state management.
 - Real-time user session handling with Firebase backend.
-

EDUCATION

Bachelor of Artificial Intelligence

2023 – Present

Khwaja Fareed University of Engineering & Information Technology

SKILLS

- Flutter UI Development
 - Firebase Authentication & Firestore
 - API Integration
 - State Management (GetX)
 - Local Storage (SharedPreferences, Get_Storage)
 - Cloudinary for media storage
 - Syncfusion Charts for analytics
 - Firebase Cloud Functions & Notifications
 - Clean Architecture & Modular Code
-

CERTIFICATIONS / TRAINING

Flutter App Development Course

Dev Castle Software House | 2024

- UI design, Firebase integration, GetX state management.

Flutter App Development Certificate

VirtueNetz, Rahim Yar Khan / 2025

- Internship-based learning of advanced Flutter workflows and real-time systems.

AWS Solutions Architect – Job Simulation Course

AWS via Virtual Internship Platform / 2025

- Simulated cloud-based project delivery, focused on AWS infrastructure and service integration.
